Subject: Serial No. 09/695,571

RECEIVED

AUG 22 2005

**OFFICE OF PATENT PUBLICATION
DIRECTOR'S OFFICE**

Dear Ms. Clark - attached please find copies of the papers we filed with the office on November 17, 2004, February 17, 2005 and February 28, 2005, each time in response to calls from the office. These papers include facsimile confirmation pages indicating successful transmission of these documents to the office. Specifically, we filed the papers on November 17, 2004 and February 17, 2005 in response to calls from Examiner Goodwin, and we submitted the abstract again on February 28, 2005 in response to a call from I believe a Cami Cuneo (spelling I am sure of, but her number is 571-272-1957).

The last document that we received from the USPTO was the Notice of Allowance dated February 13, 2004, which we responded to on May 13, 2004 with (i) formal drawing (ii) a check for \$1,330 (iii) the issue fee transmittal (iv) an amendment after allowance and (v) a proposed drawing amendment.

I appreciate you help in trying to sort this out and get this case to issue.

If you have any questions, please call me or Sarah Henry (x100). Best regards.

Patrick J. O'Shea

DECLARATION AND POWER OF ATTORNEY

We, the below named inventors, hereby declare that:

Our residences, post office addresses, and citizenships are as stated below next to our respective names.

We believe we are the original, first, and joint inventors of the subject matter which is claimed and for which a patent is sought on the invention entitled RADIO CONTROLLABLE CLOCK, the specification of which was filed with the United States Patent and Trademark Office on October 24, 2000 and designated Serial No. 09/695,571.

We hereby state that we have reviewed and understand the contents of the above identified specification, including the claims.

We acknowledge the duty to disclose information which is material to patentability in accordance with Title 37, Code of Federal Regulations, Section 1.56.

We hereby declare that all statements are made hereby of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

And we hereby appoint:

Patrick J. O'Shea	-	Reg. No. 35,305
Richard Getz	-	Reg. No. 36,147
Richard Kosaskowski	-	Reg. No. 33,934.

all of the firm of O'Shea, Getz & Kosaskowski, P.C., our attorneys with full power of substitution and revocation, to prosecute this application and to transact all business in the Patent and Trademark Office connected therewith.

We request that all correspondence be directed to:

ABSTRACT

A radio controllable clock includes an analog display having a plurality of clock hands each fastened to a uniquely associated one of a plurality of clock hand shafts that each rotate about a common axis. The clock also includes a plurality of rotary gears each uniquely associated with one of the clock hand shafts, for rotating the clock hand shafts. Each rotary gear has a face perpendicular to the common axis, wherein each of the rotary gears includes a protrusion extending substantially perpendicular from the face. A microcontroller provides a plurality of drive command signals and the rotary gears are driven responsive to the drive command signals. A reset claw is operably positioned to engage at least one of the protrusions to stop the rotation of the clock hand shaft associated with the protrusion in order to position the clock hand associated with the protrusion at a datum position.
